

ANTI SKID

The most effective way to
create non-slip polyolefins

AntiSkid Coating non-skid spray from Mold In Graphic Systems® eliminates the need for creating costly textured surfaces in the mold-making process. It can be used for pool steps, water toys, snow equipment, outdoor decking and pre-formed machinery steps. AntiSkid can be custom color matched so your products always look extraordinary.

AntiSkid Spray and particulate

1. Apply AntiSkid Spray to part

2. Sprinkle with particulate

3. Seal particulate with a second coat of AntiSkid Spray

4. Cure with heat source

Permanent, skid-free surface

Make your products extraordinary.
